Mobile No. 9031112667, **Address:** Jamshedpur, Jharkhand

About Me

Computer Science undergraduate with hands-on experience building full-stack web applications and AI-powered solutions using React.js, Node.js, Python, and REST APIs. Skilled in designing scalable applications, integrating modern AI technologies, and collaborating in hackathons and team projects. Passionate about software engineering, backend development, and machine learning.

Technical Skills

- **Programming Languages** - Python • JavaScript (ES6+) • Java • SQL • HTML5 • CSS3
- **Frontend** - React.js • React Native • Tailwind CSS • Responsive Web Design • UI/UX
- **Backend** - Node.js • Express.js • Django • REST APIs • Firebase Authentication
- **Databases** - MongoDB • SQL • NoSQL • DBMS
- **AI & Machine Learning** - Python • Pandas • NumPy • Scikit-learn • Data Preprocessing • Machine Learning Fundamentals • NLP Basics • Prompt Engineering • Google Gemini API
- **Tools & Platforms** - Git • GitHub • VS Code • Postman • CI/CD Pipelines • Vercel • Render • Firebase • Cloudinary
- **Core Computer Science** - Data Structures & Algorithms • Object-Oriented Programming • Software Engineering • SDLC • Version Control • API Integration

Experience

- **Tata Steel – Software Engineering Intern**
- *Jamshedpur, India | [05th May 2026 – 15th June 2026]*
- Assisted in developing and optimizing internal web applications for process automation.
- Worked with Python, SQL, and Django to streamline workflows and improve data handling efficiency.
- Collaborated with senior engineers to implement CI/CD pipelines, reducing deployment time.
- Contributed to data visualization dashboards for monitoring production metrics.
- Gained exposure to large-scale enterprise systems and industry-standard practices.

Projects

Automata Engine

Tech Stack: JavaScript, HTML5, CSS3, Google Gemini API

- Developed an AI-powered interactive learning platform for Automata Theory concepts including DFA, NFA, PDA, Turing Machines, Regular Expressions, and Context-Free Grammars.
- Integrated Google Gemini API to generate intelligent explanations and automate diagram generation.
- Designed a responsive and WCAG-compliant interface with dark/light theme support.
- Improved learning experience through interactive visualizations and AI-assisted content generation.
-  [Live Demo](#)

DevChatPro – Real-Time Messaging & Video Calling Platform

Tech Stack: React.js, Node.js, Express.js, Firebase Auth, JWT, Socket.io, WebRTC, Cloudinary, CSS, Vercel, Render

- Built a full-stack communication platform supporting secure real-time messaging, voice calls, video calls, and screen sharing.
- Implemented Firebase Authentication with JWT-based authorization for secure user access.
- Developed WhatsApp-style messaging with typing indicators, read receipts, and persistent chat history.
- Integrated WebRTC for peer-to-peer communication and Socket.io for real-time messaging.
- Built Progressive Web App (PWA) functionality for improved mobile experience and offline capability.
- Deployed frontend on Vercel and backend on Render.
-  [Live Demo](#)

Achievements

- **1st Place – Trikaya & Bettlex Hackathon**
Led the development team and secured first place by building an innovative software solution.
- **Runner-Up – NSU Tech Event**
Developed a rapid e-commerce web application under strict time constraints.
- **Top 5 Finalist – RVS Engineering College Hackathon**
Represented the team during the final project presentation and technical evaluation.

Education

- **Bachelor of Technology in Computer Science & Engineering**
Netaji Subhash University, Jamshedpur | 2024–2028
- **Higher Secondary (10+2)**
Vivek Vidyalaya School, Jamshedpur | 2022–2024

Certifications

- **Java Core / Java Advanced** – Sri Ram Academy (June 2024 – November 2024)
- **DSA** – Sri Ram Academy (December 2025 – April 2026)
- **Into to ML/AI/Gen AI/ Agentic AI/NLP** – Microsoft
